

Loading data in Hive tables

- Unzip the dataset -
 - **unzip /home/itv180149/Hive/Basic_Commands/employees.zip -d /home/itv180149/Hive/Basic_Commands/**
- Put data file into HDFS -
 - **hdfs dfs -put /home/itv180149/Hive/Basic_Commands/employees.txt /user/itv180149/**
- Load data into the table from HDFS -
 - **load data inpath "/user/itv180149/employees.txt" into table emp;**
- Check table directory -
 - **hdfs dfs -ls /user/itv180149/warehouse/demo_01.db/emp**
- Describe table -
 - **describe emp;**
- To see more information about the table -
 - **describe extended emp;**
- Replace *extended* with *formatted* will make the output more readable -
 - **describe formatted emp;**
