

## Introducing the Dataset

- Unzip dataset in Itversity -
  - **unzip Hive/Partitions/Hospital\_Data.zip -d Hive/Partitions**
- Create hospital table -
  - **create table hospital( Hospital\_Code int, Hospital\_Type\_Code char(1), City\_Code\_Hospital int, Hospital\_Region\_Code char(1), Address string row format delimited fields terminated by '\$');**
- Put file to HDFS -
  - **hdfs dfs -put**  
**/home/itv180149/Hive/Partitions/Hospital\_Data/hospital.txt**  
**/user/itv180149**
- Load data into Hive table -
  - **load data inpath "/user/itv180149/hospital.txt" into table hospital;**
